

ITP-5100 Series

Voice over IP Keysets

The OfficeServ™ ITP-5107S, ITP-5112L and ITP-5121D, Samsung's line of Voice over Internet Protocol (VoIP) Keysets, utilize standard IP protocols. These keysets combine the features and capabilities of our standard digital keysets with the latest in technological innovation.

The ITP-5112L and the ITP-5121D keysets provide easy-to-use navigation keys for quick access to the features you use most and enable you to customize your phone to meet your personal needs. In addition, the ITP-5112L offers a large color LCD display, built-in phone book, calculator, text messaging and so much more.

The ITP keysets are compatible with Samsung's elite line of systems, including the OfficeServ™ 7000 Series and the OfficeServ 500 and OfficeServ 100 IP-enabled systems. Need to add more phones? Expand your system with ease by adding more of these powerful VoIP keysets to your new or existing LAN. Thanks to the two built-in 10/100 Base-T LAN ports, the ITP-5112L and the ITP-5121D keysets require only a single data connection to carry both voice and data traffic. Connect your computer to these phones and you are ready to go. The ITP-5107S keyset provides feature-rich functionality with one 10/100 Base-T LAN port.

Save money by using the ITP keysets in remote applications, such as a home office, remote agents, part-time employees, satellite offices, or virtually anywhere you can access the Internet. Security is not an issue as only authorized phones connect to Samsung phone systems. In addition, use of the ITP keysets reduces the amount you pay in toll charges and simplifies administration.

Make the investment in your company's future today and take full advantage of IP technology that will position your business for success.
